ABOUT ME

Over the past few years, I have worked in the creative industry, where beyond my core production responsibilities I regularly collaborated with clients, gathered requirements, prepared proposals, coordinated projects, and managed stakeholder communication throughout the project lifecycle. During this time, I received positive feedback for my collaborative approach with both clients and colleagues, my willingness to learn new skills quickly, and my creative problem-solving abilities.

SKILLS

- Client Communication
- Cross-Functional Collaboration
- Requirement Gathering
- Project Coordination
- Solution-Oriented Thinking
- Adaptability
- Time Management
- Continuous Learning

EDUCATION

ISTQB CTFL Certification

Hungarian Testing Board
March 2025

BSc Architectural Engineering

Ybl Miklós Faculty of Architecture
and Civil Engineering
Sept 2013 - Jan 2019

COURSES

Front-End Development Course

Codecool
March 2022 - August 2022

3ds Max, V-Ray, Corona & Advanced Photoshop Courses

LUMEN Courses
Jan 2017 - Feb 2019

LANGUAGES

- Hungarian - Native Proficiency
- English - Advanced written and verbal communication

WORK EXPERIENCE

3DRendeer

Dec 2022 - Jan 2025

3D Generalist

Contributed to a wide range of architectural and product visualization projects, taking part in the entire production process from concept development and client communication to project planning and final delivery.

- Managed direct communication with clients, gathering requirements, providing professional consultation, and aligning project expectations.
- Participated in project scoping, quotation preparation, resource planning, and defining project deliverables.
- Actively contributed to the development of creative concepts and visual directions.
- Coordinated project workflows across multiple production stages while ensuring deadlines and quality standards were met.
- Delivered high-quality visualizations (still images, animations), working both independently and within a team.

Freelancing

Aug 2020 - Dec 2022

Architectural Visualization & Design

Managed architectural and visualization projects independently, overseeing the entire project lifecycle from client acquisition and project planning to delivery and ongoing client relations.

- Delivered architectural and visualization solutions independently, overseeing the entire project lifecycle from client acquisition and project planning to delivery and ongoing client relations.
- Prepared quotations, negotiated project terms, defined project scope, and managed client expectations throughout project execution.
- Maintained continuous communication with clients, ensuring transparency, alignment, and long-term professional relationships.
- Developed new business opportunities through client outreach, networking, and relationship building.
- Collaborated with architects, interior designers, and design studios, including 81font, Urba, and Hello Wood.

Whitebox Visual

Jan 2019 - Aug 2020

Architectural Illustrator

Worked on architectural visualization projects in a collaborative studio environment, gaining experience in client-driven production workflows and multidisciplinary teamwork.

- Produced high-quality 3D renders for residential and commercial architectural projects.
- Developed an understanding of client requirements and quality expectations in commercial projects.
- Built strong adaptability by working across a variety of projects, quickly transitioning between different workflows, priorities, and client expectations.
- Collaborated with team members across multiple project stages, strengthening communication and teamwork skills.
- Contributed to the successful delivery of projects by maintaining quality standards and meeting production schedules.
